

Recognized vaccinations

The AXA supplementary outpatient insurance contributes to the costs of preventive vaccinations that are medically recognized in Switzerland but not covered by mandatory health insurance.

As of: April 25, 2024

The costs of the following vaccinations are covered by the AXA supplementary outpatient insurance:

- Yellow fever
- Rabies
- Japanese encephalitis
- Typhoid fever (typhus abdominalis)
- Cholera
- Herpes zoster (shingles)
- Rotavirus gastroenteritis

The costs of the following vaccinations are covered by basic insurance (minus excess and deductible):

- Tick vaccination (tick borne encephalitis)
- Measles, mumps, rubella (MMR)
- Chickenpox (varicella)
- Diphtheria (every 10 years)
- Tetanus (every 10 years)
- Whooping cough (pertussis)
- Haemophilus influenzae type B
- Pneumococcal infections
- Poliomyelitis (polio)
- Hepatitis B
- Hepatitis A for special risk groups
- Influenza
- Annual flu vaccination for persons aged 65 and above and individuals with an increased risk of complications in the event of flu
- Cervical cancer (human papilloma virus, HPV). For girls and young women aged 11–19 vaccination costs are reimbursed, at no cost, if vaccination is carried out as part of a cantonal program.
