

# SmartElection

With SmartElection, Axa Pension Solutions offers you an online tool for the election of your board of trustees that is unique in Switzerland. The electronic voting system guarantees efficient and low-cost implementation using the highest security standards when it comes to data protection. SmartElection saves time, reduces paper consumption and is extremely user-friendly. See for yourself!

### New election concept

SmartElection is an electronic system for electing the members of the board of trustees via an online platform. The tool for the first time covers both the candidacy and election phases. With SmartElection you can reduce your election costs without compromising on security and data protection. Easy navigation through the entire candidacy and election process simplifies the voting procedure for the voters as well as the election office. SmartElection warrants transparent election proceedings in strictest compliance with the principles of electoral law.

### Candidacy process

1. Capture candidates
2. Check candidates
3. Publish candidates

### Election progress

1. Registration for reminder service
2. Call to vote
3. Voting
4. Vote counting
5. Publication of results

### Application

- Candidates register online
- Integrated process support for the checking of candidates
- Simplest application and program administration
- Guarantee that voters will only be able to vote once
- No external software needed
- Layout can be adjusted to meet company-specific needs (logo, colors, font)

### Advantages

- Lower cost in holding elections
- Reduced personnel costs
- Savings from printing and distributing election documents
- Shorter elections on the whole
- Strong data protection
- High flexibility
- Very user-friendly
- Professional image with insured persons
- Quick analysis of the election results
- Positive impact on environmental management
- Simple and attractive pricing

### Reduction of costs with SmartElection
