

# Your assistant for more safety and comfort when driving

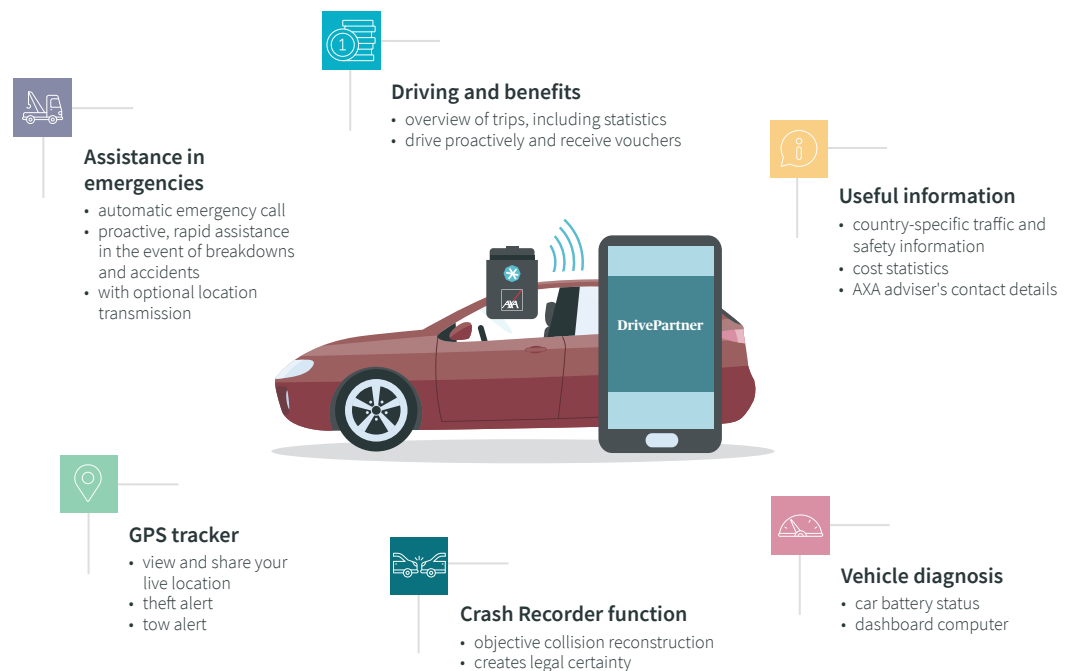

You need help in an emergency or want to share the location of your car? **The free DrivePartner provides 24/7 assistance via an app with smart driving-related functions that are constantly being expanded.** As a driver who thinks ahead you can also accumulate points and benefit from attractive exchangeable vouchers.

## How does the DrivePartner work?

Developed in collaboration with our partner ryd suisse AG, the DrivePartner is your daily companion, round the clock wherever you are. Because: Your smartphone can show you the key facts relating to your car, just like a dash-

board computer. You will also receive push notifications containing useful driving information. And in the case of an accident you can, for instance, reconstruct the events leading up to it using acceleration sensors and prove your innocence.

## Smart functions for every car

## The DrivePartner is only a few steps away

1. Take out car insurance with AXA and order the free DrivePartner at the same time. Is your car already insured with us? Then call the toll-free number 0800 809 809 or contact your adviser.
2. You will receive the DrivePartner by post from our partner ryd suisse AG, including instructions for easy installation. Install the DrivePartner within 30 days of receiving it.
3. With certain vehicle types you won't be able to carry out the installation yourself. If this applies to your car, the installation needs to be done by our partner DESA, at no extra cost to you of course. You will find all the necessary information plus details of how to schedule an installation in your DrivePartner documentation.

### Technical features

- Your DrivePartner consists of the ryd box and the ryd app.
- The ryd box is connected directly with your car and is 100% maintenance-free, comparable to a USB stick.
- All the recorded data are sent encrypted to the ryd server and can be viewed on the ryd app.

Whenever you use an AXA service, the corresponding data will be needed. For instance, if your car breaks down and you contact us via the ryd app and let us know your position, or if your DrivePartner registers an accident. In this case, AXA will receive the data directly relevant for reconstructing the events that led to the accident and providing the legal certainty to prove your innocence. AXA does not have access to other data such as daily journeys or driving behavior.

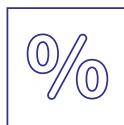

### Installation and removal

AXA will assume the costs of the unit and installation by DESA. If you no longer wish to use the DrivePartner, your contract can be amended at any time and the DrivePartner returned. Should you require help removing the unit DESA will assist you free of charge.

### Additional benefits

- Automatic emergency call (chargeable); AXA will contact you by phone if a collision is registered. Depending on the force of the impact, an ambulance will be called
- Crash Recorder; prove your innocence in an accident
- Roadside assistance; contact AXA direct via the app, optional transmission of location
- Dashboard computer in your cellphone; indicates error codes and the condition of your car battery, tank level, gas consumption, various maintenance cost assessments, and much more
- Think ahead while driving and earn vouchers; redeemable directly via the app, e.g. for Alpamare or Digitec (offers vary)
- GPS tracker; always know and let others know where you are located and where the car is parked

### Discounts

15% premium discount for young drivers aged 18–25
