

Safe driver bonus: 15 % discount for young drivers

For all drivers aged 18 to 25 who want to save on premiums. With the safe driver bonus, young drivers receive a 15 % discount on AXA car insurance. In return, young drivers agree that AXA can send them information on safer driving. AXA can also check whether measures such as revoking their license have been taken. In the event of an accident, AXA can use data from the vehicle for accident reconstruction.

15 % premium discount

With the safe driver bonus, young drivers aged 18 to 25 get a discount on car insurance premiums. The discount ends on their 26th birthday.

Participation in prevention program

By signing up to the safe driver bonus, young drivers actively participate in the prevention program on safer driving. AXA provides full details of the program by mail. Customers then receive an SMS with brief interactive content on the prevention program approximately every two months.

Checking details

AXA can obtain information on driving license details and administrative measures from the road traffic authorities for the purposes of reviewing applications and combating insurance fraud. In other words: AXA can see whether measures such as revoking their license have been taken against young drivers.

Retrieval of accident data

Newer vehicles often record accident data directly. AXA can retrieve this information in the event of an accident and use it to reconstruct the accident. These are data recorded directly by the airbag control unit, for example, and include speed, acceleration, delay, date, and time.
